

amaalsahari.com - Version 7

QA / Bug Report

1. Services Details Management

- No ability to add images inside the Service Details page from the Admin Panel.

Expected:

- Ability to upload and insert images within the service details content.
- Ability to edit or delete images from the admin panel.

Priority: High

2. Services & Case Studies Content Formatting

- Cannot add images inside service details or case study detail pages.
- Text cannot be formatted into paragraphs.
- No rich text editor for headings, lists, or formatting.

Expected:

- Add a Rich Text Editor allowing:
 - Images insertion
 - Paragraph formatting
 - Headings
 - Lists
 - Text styling

Priority: High

3. Blog Section Issues

Issue 1: Blog cards display the entire article text which breaks the layout.

Expected: Display a short excerpt only.

Issue 2: Article content appears twice on the blog details page.

Expected: Article should appear once.

Issue 3: Refreshing the article page shows error: "Post Not Found".

Expected: Page should reload normally without errors.

Priority: High

4. News Section Navigation

- Clicking a news item from the homepage does not open the article directly.
- It redirects to the news listing page requiring the user to select the article again.

Expected:

- Clicking a news item should open the news details page directly.

Priority: Medium

5. Contact for Submission Form

- Messages are received via email but are not saved in the Submission page in the Admin Panel.

Expected:

- All submissions should be stored in the database and appear in the Submission management page.

Priority: High

6. Contact Us Page Title

- The title "Our Locations in UAE" cannot be edited from the admin panel.

Expected:

- Ability to edit this title from the backend.

Priority: Medium

7. Photo & Video Gallery (According to the agreement)

- No Photo & Video Gallery section exists on the website.

Expected:

- A gallery section to display images and videos.
- Ability to upload and manage media from the admin panel.

Priority: Medium

8. SEO & Google Analytics

- SEO settings are missing or not functioning correctly.

- Google Analytics code added from the admin panel does not work.

Expected:

- Ability to set Meta Title, Meta Description, and Keywords for each page.

- Google Analytics should activate once the tracking code is added.

Priority: High
